Description Control Module for Ranger 800cc UTV - G8020039 - DELPHI MT05 .

The Delphi MT05 Engine Control Module (ECM) Series is a family of electronic devices that assist the control of engine management systems for small engines by instantaneously measuring multiple events enabling "real time" adjustments of fuel, air and spark to help the engine operate efficiently, reliably and economically. The MT05 ECM Series offers manufacturers a low cost solution for 1-cylinder and 2-cylinder engine control, especially those that must meet Euro 3 emissions standards. The Delphi MT05 ECM Series features an up-integrated design that reduces weight and wiring, and its small package size enables chassis mounting flexibility. Will work with several vehicles, not exclusive to:
